GENERAL

AN ENVIRONMENTALLY RESPONSIBLE AID TO MICROFIBRE TECHNOLOGY

Not all 'green' cleaning products are truly environmentally responsible as advertised. Peerless JAL chemists have spent many years researching and sourcing environmentally responsible cleaning agents to formulate an exceptional cleaner that is truly green. The Research and Development team at Peerless JAL have developed the only complete environmentally responsible cleaning package on the market today. Each possible area of improvement has been explored to reduce the carbon footprint of the user.

This includes:

- ***Truly green chemicals***
- ***The use of microfibre technology resulting in less chemicals and water used.***
- ***Specialised environmentally responsible packaging for the reduction in plastics used to minimize land fill and carbon footprint.***
- ***Super concentrated chemicals to reduces transport of water resulting in reduced carbon emissions***
- ***100% recyclable Packaging***

Microaid General cleaner is a super concentrated highly effective multi surface environmentally responsible cleaner. Microaid General has been designed as an aid for the technologically advanced and effective microfibre cloth. When used in conjunction with Microaid General, the capillary force in the Microfibre breaks down and encapsulates grease, dirt, food and soap scum on most surfaces. Peerless JAL' Microfibre system minimizes use and exposure to chemicals and use of water, enabling users to preserve their health and protect the environment. Microaid General is a biodegradable, phosphate free, chlorine and EDTA free product. It contains no VOC's and is not tested on animals. Microaid General contains an anti re-depositing agent that prevents soil and dirt from settling on surfaces previously cleaned. Cleaning time is gradually reduced and cost savings increase through reduced use of chemicals. The pH balanced formula will not damage the surface as other high alkaline general cleaners can, while the anti re-depositing agent leaves a soil resistant film. Microaid General contains a natural acid with sanitizing properties for superior cleaning performance in kitchen areas. Microaid General makes use of new technology available; a 'Green' wetting agent and surfactant promoting efficient spreading and surface coverage of Microaid General cleaner. Microaid General can be used on most washable surfaces such as floors, appliances, glass, computer screens, benches, tables, chairs, sinks and etc. The pleasant, natural fragrance, deodorizes as it cleans, leaving the space fresh and clean. Microaid General is an easy and quick to use highly concentrated product. Packed in 1L soft, recyclable packaging, Microaid General can be diluted as 20 ml in 500 ml for general cleaning or 40ml in 500ml of water for heavy duty cleaning.

FEATURES AND BENEFITS

- Super Concentrated: one pack makes over 25 Lt.
- Small packaging: easy to handle, quick dilution technique.
- Environmentally responsible: non toxic and non corrosive.
- Non dangerous and non hazardous.
- Free of Chlorine, Phosphates and Volatile Organic Compounds.
- Biodegradable: safe for aquatic and bird life.
- PH balanced formula for best results.
- Sanitizer: Contains natural acid which works as a surface sanitizer.
- In conjunction with Microfibre, Microaid General effectively removes grease, dirt, food and soap scum on any surface.
- Reduces future cleaning time: Microaid General contains an anti re-depositing agent that shields the surface after cleaning and reduces the settling of dirt on surfaces.
- Newest technology on the market: 'Green' wetting agent and surfactant will promote efficient spreading and surface coverage of Microaid General cleaner to promote quicker cleaning time.
- Pleasant natural fragrance: deodorizes as it cleans.
- Rinse free.

- Multi surface cleaner: Floors, Appliances, Glass, Computer Screens, Benches, Tables, Chairs, Sinks and etc.
- Recyclable packaging: Microaid General is packaged in 100 % Recyclable material.
- Not tested on animals

TECHNICAL INFORMATION

Description:	Microaid General Cleaner/Multi surface cleaner
Appearance:	Navy blue free flowing liquid
pH:	7.5 - 8.5 Concentrate
Odour:	Fougere / Woody / Amber
Specific Gravity:	1.02 – 1.03
Clarity:	Clear liquid
Classification:	Non DG, Non Hazardous
VOC Content:	No VOC
Toxicological Information:	Not Toxic
Degradability:	Biodegradable

DIRECTIONS FOR USE:

For best results please use Peerless JAL's Microfibre in conjunction with Microaid General

Fold cloth into 1/2 then 1/2 again. Place Microaid General solution on the cloth or directly onto the surface. Wipe surface - change cloth sides when heavily soiled. Rinse cloth with fresh water, ring out thoroughly and repeat.

For general use dilute 20ml of Microaid General Cleaner with 500 ml of water.

For heavy duty cleaning dilute 40ml of Microaid General Cleaner with 500 ml of water.

SAFETY: This material is not classified as hazardous according to criteria of Safe Work Australia.

Avoid contact with skin and eyes. Avoid breathing dust, fume, gas, mist, vapour or spray. Wear overalls, safety shoes, impervious gloves and safety glasses. Use only in well ventilated areas. Wash hands after use. Keep containers closed when not in use.
