

ANTI-BACTERIAL LIQUID HAND SOAP

Liquid Hand Wash - For Dispensers

Contains: Chloro xylenol 2.0 g/l

Liquid Hand Soap is manufactured using gentle cosmetic detergents and lanoline moisturisers. Also incorporated is the well known active ingredient Chloro Xylenol (Dettol), which helps eliminate unwanted bacteria from the skin.

Liquid Hand Soap is pH balanced - your skin has a natural, slightly acidic moisture layer which inhibits the growth of harmful bacteria. Typical alkaline soap products destroy this layer, leaving skin feeling dry.

Liquid Hand Soap is ideally suited to cleaning hands in food preparation operations, restaurants, farms, garden nurseries, child care centres, bathroom amenities and great for use around the home.
