| | ✗ phthalates |
| | ✗ heavy metals |
| | ✗ ozone-depleting substances |
| | ✗ amines |
| | ✗ butyl solvents |
| | ✗ chlorine |

PROPERTIES

Colour: Green

Odour: Floral

pH: 6.0 - 7.0

Foam Level: Medium height

Shelf Life: Minimum 1 year (5°C - 50°C)

Disinfectant Power: Commercial-grade disinfectant at 1 in 50 dilution

AVAILABLE SIZES

Available in 5L

HOW TO USE

Dilute 1 part Aura in 50 parts with water.

WHERE IT WORKS

Aura is ideal for cleaning and disinfecting floors, walls, benches, tables, desks, touch points, sinks, baths, toilets, tiled areas and fittings.

HOW IT WORKS

Aura is a fresh, pleasant-scented commercial-grade disinfectant with a powerful cleaning action that leaves surfaces disinfected and clean. The clever formula attacks and breaks down dirt and grease, and kills germs and destroys odours leaving a long-lasting and pleasant fragrance.

HEALTH

Concentrated Aura is classified as hazardous according to the criteria of Safe Work Australia. It is irritating to the skin and causes serious eye damage. Aura is not classified as Dangerous Goods according to the criteria of the Australian Safety and Compensation Council (ASCC). It contains no ingredients that are classed as Toxic.

Aura becomes non-hazardous when diluted to 1 in 10 (10%) in water. Please refer to the Safety Data Sheet for more information.

QUALITY

The design, manufacture, and supply of all Chemrose products is controlled by the Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

Certification available on request.

DISPOSAL INFORMATION

1. Used solutions

Used Solutions of Aura should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although Aura has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles

Our 5L bottles are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. Aura containers will be cleaned and reused if returned to Chemrose Suppliers Pty Ltd., significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.
