

RadiantBloom is a luxurious all-in-one body wash and hair shampoo. Enriched with aloe vera and provitamin B5, it gently moisturises and hydrates the skin while the gum extract leaves your hair silky, conditioned and manageable. RadiantBloom is pH-balanced and has a subtle fresh fragrance to delight your senses.

BENEFITS

- ✓ Effective but gentle action on the skin
- ✓ Conditions the hair
- ✓ Leaves the skin feeling soft & clean
- ✓ Gentle enough to use every day

ENVIRONMENTAL CARE

RadiantBloom conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there are no waste or environmental concerns. RadiantBloom is phosphate-free, water-based and biodegradable. RadiantBloom containers will be cleaned and reused if returned, significantly reducing plastic usage and waste. They can also be recycled.

PROPERTIES

Appearance: Opalescent viscous liquid

Colour: Translucent White

Odour: Subtle fragrance

pH: 5.5 – 6.5

Foam Level: Rich, stable foam

AVAILABLE SIZES

Available in 5L

HOW TO USE

Wet the skin and hair. Pour a small pool of RadiantBloom about the size of a 10 cent coin into the palm of the hand. Apply product first to the wet hair and rub in thoroughly, then use as body wash. A shower sponge may be used to good effect in lathering up RadiantBloom. Rinse off with water. Repeat when necessary.

WHERE IT WORKS

RadiantBloom is suitable for all skin and hair types, including those with sensitive skin.

QUALITY

The design, manufacture, and supply of all Chemrose products is controlled by the Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

Certification available on request.

Chemrose maintains Safety Data Sheets (SDS) on all of its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Chemrose recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.

DISPOSAL INFORMATION

1. Used solutions

Used solutions of RadiantBloom should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although RadiantBloom has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. Chemrose Suppliers Pty Ltd recycles containers wherever possible, significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.

Chemrose maintains Safety Data Sheets (SDS) on all of its products.
