

Sting is an alkaline-based, heavy-duty detergent formulated for a wide range of uses wherever you find dirt, oil, and grease. It will quickly remove these soils from surfaces like floors and walls, equipment and machinery, and ovens and barbecues, rinsing away easily for a clean and sparkling surface.

BENEFITS

- ✓ Attacks dirt quickly and easily
- ✓ Extremely versatile degreaser
- ✓ Exceptional cleaning power

ENVIRONMENTAL CARE

Sting was developed from carefully selected ingredients providing many environmental benefits including:

- ✓ biodegradable ingredients
- ✓ renewable & regrowable surfactants
- ✗ ammonia
- ✗ EDTA
- ✗ NTA
- ✗ butyl glycol
- ✗ nonyl phenol ethoxylates
- ✗ free caustics
- ✗ chlorine
- ✗ phthalates

PROPERTIES

Colour: Transparent brown liquid

Odour: None

pH: 12.8 ± 0.5 (undiluted)

Foam Level: Thick, stable foam

AVAILABLE SIZES

Available in 5L

HOW TO USE

| | AMOUNT TO USE |
|-------------------------------|---|
| Floors | Mopping: Dilute 1 part Sting in 66 parts with water Scrubbing: Dilute 1 part Sting |
| Walls, paintwork & upholstery | Dilute 1 part Sting in 10 parts with water |
| Ovens, BBQs & Heavy soils | Dilute 1 part Sting in 5 parts with water. Apply solution by cloth, mop or sponge. Allow a few minutes of dwell time to break down soilage. Scrub if necessary. Rinse clean with water |

NOTE: This is a guide only. Concentration may be varied according to the degree and persistence of soilage.

WHERE IT WORKS

Sting will remove grease, oil, greasy cooking fats, smoke films, ink stains and food spills from floors, equipment, machinery, paintwork, ceramic tiles, quarry tiles, concrete, walls, ovens, barbecues and vinyl upholstery. Sting may be used in steam cleaners, autoscrubbers, mop-buckets or by spray-and-wipe.

HOW IT WORKS

Sting is a concentrated detergent grease-remover. It rips into oil and dirt and lifts it away from the surface. Dirt is suspended and won't redeposit back onto the cleaned area. Sting rinses away freely to leave a clean, sparkling surface.

CAUTION

Sting is an alkaline cleaner. It may produce burns if skin or eye contact occurs. Wear eye protection and protective gloves when mixing or using this product.

HEALTH

Sting is classified as Corrosive according to the criteria of Safe Work Australia. It is irritating to the skin and causes serious eye damage. Sting contains no ingredients that are classed as Toxic.

Sting becomes non-hazardous when diluted to 1 in 33 (3%) in water. Please refer to the Safety Data Sheet for more information.

QUALITY

The design, manufacture, and supply of all Chemrose products is controlled by the Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

Certification available on request.

DISPOSAL INFORMATION

1. Used solutions

Used Solutions of Sting should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rain water and ultimately lead to the local river system. Although Sting has a low aquatic toxicity, detergents in general are not good for aquatic wildlife.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container). If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the waste water. Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles

Our 5L bottles are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. Sting containers will be cleaned and reused if returned to Chemrose Suppliers Pty Ltd., significantly reducing plastic usage and waste.

Cardboard cartons

Our cartons contain a minimum of 70% of recycled cardboard and/or paper. Used boxes should be flattened and recycled in OCC (old corrugated cardboard) or mixed waste paper recycling programs.
