

DIGGERS™ Shellite

DESCRIPTION

DIGGERS™ Shellite is a flammable hydrocarbon solvent used primarily as lighter fuel. (Also known as Recosol R55.)

TYPICAL USES

- Lighter fuel
- Metal cleaning
- Fuel for Shellite stoves, torches and lanterns

FEATURES

- Colourless liquid with a paraffinic, sweet odour
- A weak solvent that is unlikely to affect the surface of most materials
- Performs well in situations requiring a solvent that evaporates quickly with no residue
- Solvency – high solvency of greases and oils means it can be used to clean surfaces prior to painting
- Clean burning

APPLICATION

As a Fuel

- Use undiluted as a clean burning fuel for Shellite stoves, torches and lanterns. Fill Shellite stove ONLY when flame is extinguished and burner has cooled down. Do NOT use in Kerosene or Methylated Spirits burners.

As a Cleaning Fluid

- Use direct from bottle as a cleaning fluid. Brush on liberally, wipe clean and let dry.

SAFETY

Wear suitable protective clothing, gloves and eye/face protection when using this product.

TYPICAL CHARACTERISTICS

Appearance colourless liquid
Specific Gravity 0.67–0.755
Flash Point -30°C
Boiling Point 50–135°C
Flammability Limit 1–7.5%
