

QKIND Machine Glass Washing Detergent

Compilation Date: 1 January 2006

Issue Date: 12 October 2021

Revision No: 3.0

1. Chemical Product and Company Identification

Product Name Other Means of Identification Machine Glass Washing Detergent

Potassium hydroxide solution

Product Code
Product Use

5lt: AQKBGLA5, 20lt: AQKBGLA20
Machine glass washing detergent

Supplier QKIND

Mail Address

2/594 Boundary Road, Archerfield QLD 4108

sales@gkind.com.au

1300 00 44 12

2. Hazards Identification

Statement of Hazardous Nature

Classified as hazardous according to the Globally Harmonised System (GHS) criteria and classified as a dangerous good according to Australian Dangerous Goods Code

SUSMP Classification: S6

ADG Classification: Class 8: Corrosive Substances.

UN Number: 1814, Potassium Hydroxide Solution, N.O.S. (Potassium hydroxide)

GHS Classification Skin corrosion category 1

GHS Label Elements

SIGNAL WORD

DANGER

Corrosive to Metals - Category 1 Acute Toxicity Oral - Category 4 Skin corrosion - Category 1 Eye corrosion - Category 1A

Hazard Statement(s)

H290

May be corrosive to metals.

Page 1 of 8 Auto Glass Washing Detergent SDS Version 3.0 Created 12 October 2021

QKIND Machine Glass Washing

Detergent

H302	Harmful if swallowed.
H314	Causes severe skin burns and eye damage.

Prevention(s)

P102	Keep out of reach of children.
P234	Keep only in original container.
P260	Do not breathe dust / fume / gas / mist / vapours
	// spray.
P264	Wash hands thoroughly after handling.
P270	Do not eat, drink or smoke when using this product.
P280	Wear protective gloves / protective clothing / eye protection / face protection.

Refer to the SDS before using the product

Response

	P301+P312+ P330:	IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Call a POISON CENTRE or doctor if you feel unwell
	P301+P330+P331 P303+P361+P353	IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water.
	P304+P340	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
	P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
	P310	If unwell Immediately call a POISON CENTER or doctor/physician.
	P321	Specific treatment (see First Aid Measures on Safety Data Sheet).
	P363	Wash contaminated clothing before reuse.
	P390	Absorb spillage to prevent material damage.
S	torage	

S

P405	Store locked up
P406	Store in corrosion resistant container

Disposal

P501	Dispose of contents/container in accordance with
	local/regional/national/international regulations.

3. Composition/Information on Ingredients

(Listed when present at 1% or greater, carcinogens at 0.1% or greater)

QKIND Machine Glass Washing Detergent

Chemical Name	CAS Registry Number	% Weight	Hazard
Potassium hydroxide	1310-58-3	<10	H290: May be corrosive to metals. H302: Harmful if swallowed. H314: Causes severe skin burns and eye damage. TWA: 2 mg/m3 STEL: 2 mg/m3 "peak"
Tetra potassium pyro phosphate	7320-34-5	<10	H319: Causes serious eye irritation
Sodium Silicate	1344-09-8	<10	H315: Causes skin irritation. H319: Causes serious eye irritation.
Alkyl polyglycoside	Mixture	<5	H318 Causes serious eye damage. H402 Harmful to aquatic life.
Ingredients determined to be non- hazardous	various	<5	None
Water	7732-18-5	> 60	None

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak "is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

4. First Aid Measures

General For advice, contact a Poisons Information Centre (Australia 13

11 26) or a doctor. If swallowed, do NOT induce vomiting.

Immediately give a glass of water.

Inhalation If swallowed or inhaled, remove from contaminated area. Apply

artificial respiration if not breathing. Do not give direct mouth-to-mouth resuscitation. To protect rescuer, use airviva, oxy-viva or

one-way mask. Resuscitate in a well-ventilated area.

Skin: If skin or hair contact occurs, remove contaminated clothing and

flush skin and hair with running water

Eyes If in eyes. Hold eyelids apart and flush the eye continuously with

running water. Continue flushing until advised to stop by a Poisons Information Centre (Australia 13 11 26) or by a doctor,

or for at least 15 minutes.

Ingestion: If person is conscious, rinse mouth thoroughly with water, first

then give a glass of water to drink. If swallowed, DO NOT induce vomiting. If vomiting occurs, wash out mouth again with water and give another glass of water to drink. Seek medical attention

urgently.

Symptoms Caused by Exposure (Chronic)

No data available

QKIND Machine Glass Washing Detergent

First aid facilities Ensure eyewash and safety shower facilities are available in

workplace.

Advice to Doctor

Major Spills

Medical Attention and Special Treatment

Treat symptomatically as for strong alkali. Can cause corneal burn. Mucosal damage may contraindicate the use of gastric

lavage.

5. Fire Fighting Measures

Fire and Explosion Water based. Not combustible. However if involved in a fire will

Hazards emit toxic fumes.

Extinguishing Media Carbon Dioxide, foam, dry powder, water, water spray.

Fire Fighting

Keep containers exposed to extreme heat cool with water spray.

Fire fighters to wear self- contained breathing apparatus if risk of

exposure to products of combustion or decomposition.

Flash Point None HAZCHEM CODE 2R

6. Accidental Release Measures

Personal Precautions Wear protective eyewear, chemical resistant boots,

impervious overalls and gloves.

Environmental Seek disposal options by a licensed waste contractor Precautions

riecaulons

Minor Spills Clean up all spills immediately.

Avoid breathing vapours and contact with skin and eyes. Control personal contact with the substance, by using

protective equipment.

Contain and absorb spill with sand, earth, inert material or

vermiculite. Wipe up.

Place in a suitable, labeled container for waste disposal.

Clear area of personnel and move upwind.

Alert Fire Brigade and tell them location and nature of

hazard.

Wear full body protective clothing with breathing apparatus. Prevent, by any means available, spillage from entering

drains or water course. Stop leak if safe to do so.

Contain spill with sand, earth or vermiculite.

Collect recoverable product into labeled containers for

recycling.

7. Precautions for handling and storage

QKIND Machine Glass Washing Detergent

Precautions for Safe

Handling

Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash

hands with water after handling.

Conditions for Safe

Storage

Store in a cool, dry, place with good ventilation. Avoid storing in aluminum and light alloy containers. Store away from incompatible materials (Section 10). Keep containers closed at

all times - check regularly for leaks.

8. Exposure controls /personal protection

Control parameters OCCUPATIONAL EXPOSURE LIMITS (OEL) INGREDIENT DATA

National Exposure

Standards

Engineering Controls Individual Protection

Eyes/Face

Hands

Skin Respiratory TWA of 2mg/m3 as Potassium Hydroxide

Avoid generation and inhalation of mists and aerosols

Face shield

Rubber or nitrile gloves

Apron and chemical resistant boots If mists are generated use a respirator

9. Physical and chemical properties

Appearance non viscous liquid

Odour:
Colour
pH
Vapour pressure:
Vapour Density:
faint odour
caramel
13.5 neat
No data.
No data.

Boiling Point: Approximately 100°C (for liquid concentrate)

Boiling range No data.

Melting point No data.

Solubility in water Miscible

Specific Gravity 1.1 – 1.2 @ 25 C Flash point Non Flammable

Solubility limits N/a

Per Cent Volatile Approximately 70 % v/v

10. Stability and Reactivity

Chemical Stability Conditions to Avoid The product is stable under normal conditions

ACIDS: violent reaction can occur, yielding heat and pressure which can burst an enclosed container. Attacks many reactive metals (aluminium/magnesium/zinc alloys) releasing highly flammable gas (hydrogen) which generates fire or

QKIND Machine Glass Washing Detergent

explosion hazards. Reacts slowly with ambient air (particularly carbon dioxide) which may cause certain insoluble salts top form in solutions.

Incompatible Materials

Oxidising chemicals –, Hydrogen peroxide. Reacts with aluminium and zinc (galvanising) and forms hydrogen, which can form explosive gas mixtures with air in confined spaces.

Hazardous Decomposition Products None known

11. Toxicological information

Health effects from acute exposure

Swallowed Corrosive. Can cause damage to throat, lungs and stomach.

Eye Corrosive and may cause severe or permanent eye damage,

Concentrated solutions can cause severe irritation and

corrosion injury unless washed out immediately

Skin Irritating to skin. Brief contact may cause redness. Repeated or

prolonged contact may result in corrosion.

Inhaled

Health effects from chronic exposure

Can be irritating to the nose, throat and upper respiratory tract. Prolonged or repeated contact may cause dermatitis. No other specific data is available for the product for chronic exposure

symptoms.

Carcinogenicity

Mutagenicity

No known effect

No known effect

No known effect

No known effect

12. Ecological information

This product is harmful to aquatic organisms. This product will not accumulate in the soil or water or cause long term problems. However, until diluted or neutralised it will kill all aquatic organisms it contacts due to extreme pH.

13. Disposal considerations

Disposal Review federal, state and local government requirements prior to disposal.

14. Transport Information

QKIND Machine Glass Washing Detergent

UN Number 1814

Proper Shipping Name | Corrosive Liquid (Potassium solution)

DG Class

SUBSIDARY RISK none allocated

Packaging Group II

Recommended Use Special precautions for

users

Detergent for machine dishwashing, food process cleaning. Ensure containers are clearly labelled. Keep containers securely sealed and protected against physical damage. Store away from

acids. Do not use aluminium or galvanized containers. Steel or

plastic containers suitable.

Hazchem Code 2R IERG Number 37

15. Regulatory Information

Packaging and Labelling

This product is a Scheduled Poison (S6) and must therefore be stored, maintained and used in accordance with the relevant State Poisons Act. Defined as a "Dangerous Good" by the Australian Code for the Transport of Dangerous Goods by Road and Rail.

16. Other information

Abbreviations

AICS Australian Inventory of Chemical Substances

CAS Number Unique Chemical Abstracts Service Registry Number

EC50 Ecotoxic Concentration 50% — concentration in water which is fatal to 50% of a test population (e.g. daphnia, fish species)
ES Exposure Standard - The airborne concentration of a biological

Exposure Standard - The airborne concentration of a biological or chemical agent to which a worker may be exposed in a work

dav

GHS Globally Harmonised System of Classification and Labelling of

Chemicals

HAZCHEM Code Emergency action code of numbers and letters that provide

information to emergency services, especially fire fighters

IARC International Agency for Research on Cancer

LEL Lower Explosive Limit

LD50 Lethal Dose 50% — dose which is fatal to 50% of a test

population (usually rats).

LC50 Lethal Concentration 50% — concentration in air which is fatal

to 50% of a test population (usually rats)

NICNAS | National Industrial Chemicals Notification and Assessment

Scheme

Peak Limitation Peak Exposure Value: The maximum airborne concentration of

a biological or chemical agent to which a worker may be

exposed at any time.

SDS Safety Data Sheet

STEL Short Term Exposure Limit - The maximum airborne concentration of a chemical or biological agent to which a

QKIND Machine Glass Washing Detergent

worker may be exposed in any 15 minute period, provided the

TWA is not exceeded

TWA Time Weighted Average — generally referred to ES averaged

over typical work day (usually 8 hours)

UEL Upper Explosive Limit
