

Deb Workplace Dispensers

PRODUCT DESCRIPTION

Unique range of 1 litre, 2 litre and 4 litre closed, sealed cartridge dispensers that meet the distinct needs of any workplace and public facility environment.

USAGE

For exclusive use with Deb skin care products to create tailored skin care and hand hygiene programmes.

METHOD OF USE

Large, 'easy-push' buttons dispense a controlled dose of product appropriate for the application required. Empty cartridges are easily replaced in seconds.

FEATURES	BENEFITS
Colour-coding	Easy visual identification of product type to encourage correct product usage and compliance.
Usage illustrations	Simple to understand and language neutral to show best practice method of use; ideal for multinational workforces.
Guaranteed for life	All Deb dispensers are manufactured from durable plastic components and rigorously tested for high usage environments, providing assurance of quality and longevity.
BioCote™ protected button 	BioCote™ antimicrobial protection technology is incorporated at the time of manufacture into the plastic buttons of all Deb manually operated, wall-mounted skin care dispensers. The button is the primary contact point for people using these dispensers and BioCote™ technology provides life-long antimicrobial protection to inhibit the growth of a broad spectrum of bacteria and moulds that could potentially cause illness.
Large push buttons	Minimises the operation force required to allow easy use by hand or elbow; suitable in hygiene-sensitive areas.
Fixed product dose	Delivers the exact amount required, controlling usage and reducing waste.
Unique locking mechanism	Helps prevent unauthorised access, pilferage and product contamination.
Sight Glass	Provides visibility of the level of product in the cartridge which helps identify when product needs replacing.
Simple cartridge replacement	Designed for exclusive use with Deb skin care system products to enable cartridges to be replaced in seconds, reducing maintenance time and costs.
Hygienic, airless cartridges	The ultrasonically sealed cartridge and pump mechanisms prevent the ingress of air into the cartridge during use to help prevent product contamination and ensure 'fresh' product is dispensed every time.
Minimal waste	The air-tight cartridges are designed to collapse to minimise product waste.

Deb Workplace Dispensers
