

r-MicronSolo

Our best performing recycled single use wipe for hygienic cleaning and excellent cleaning results

Product description

r-MicronSolo consists of a unique combination of individual super fine microfibres and highly absorbent viscose fibres.

Vileda Professional Micron Fibre Technology provides the finest split microfibres on the market. Compared to ordinary fibres, each Micron Fibre has been split into 32 segments resulting in r-MicronSolo achieving a deeper, more effective cleaning result.

With the highly absorbent viscose fibres, any spillage can be removed quickly and easily. r-MicronSolo can pick up and hold 40 % more water compared to ordinary microfibre wipes.

It's ideal for the bucket and spray method and offers a range of advantages for daily cleaning.

Application area

r-MicronSolo is the ideal solution wherever the highest level of hygiene and cleanliness are required, for example in operating theatres and patient rooms. Use the r-MicronSolo with cleaning detergent or with just water, depending on the dirt you want to remove.

How to use

- ✓ Prepare the cleaning solution in a 5-liter bucket or in a spray bottle
- ✓ Take one cloth

Bucket method only:

- ✓ Rinse r-MicronSolo cloth in the bucket
- ✓ Wring r-MicronSolo cloth according to the desired moisture level
- ✓ Fold the cloth twice

Spray method only:

- ✓ Fold the cloth twice
- ✓ Spray on the cloth
- ✓ Wipe the surface with the closed edge in the wiping direction
- ✓ Change the cloth side, when it gets dirty
- ✓ When the complete cloth is dirty, rinse it in a bucket or dispose

Customer benefits

- ✓ 99.99% virus and bacteria removal – certified by an independent test institute
- ✓ Superior microfibre cleaning performance
- ✓ Maximum single use hygiene
- ✓ Made from 35% recycled PES
- ✓ Very high absorbency for good spill pick up in one wipe
- ✓ Efficient dirt removal – even of grease dirt
- ✓ Colour coded
